FOR IMMEDIATE RELEASE

Changing Service Locations to Meet Demands **The Colvin and Stanley Health Department Locations Now offer WIC Only**

(Sedgwick County, Kansas) – As of July 19, 2004, Colvin and Stanley Health Stations will expand their Women, Infants and Children Program services, and clinical services will move to the main Health Department, 1900 E. Ninth. The WIC program provides nutrition education and supplemental foods to women who are pregnant, recently delivered or breast-feeding, and children under five years of age who meet income guidelines and have been determined to be at nutritional risk. More than 14,000 Sedgwick County residents are being served by this program, and the number continues to grow

This change in services provided at Colvin and Stanley will allow the Health Department to provide the best possible service to our customers in the most efficient manner. In 2003, the average daily number of clients using clinical services at Colvin was 7.6, at Stanley was 7.0, and at the Main Health Department was 152.2.

No staff reductions will occur as part of this change. Clinical service employees previously assigned to Colvin and Stanley will be re-located to the Main Health Department where they will provide services to a larger number of clients, help reduce waiting times for clients, and contribute to our vision of more efficiently providing high quality services.

- more -
