FOR IMMEDIATE RELEASE

Sedgwick County Health Department Temporarily Out of H1N1 Flu Shots
(Sedgwick County, Kansas) – The Sedgwick County Health Department has depleted its current stock of H1N1 flu shots. This week the Health Department has provided more than 1,000 doses of H1N1 vaccine to pregnant women and health care workers through their Wichita Mall vaccine clinic location. This includes 900 injections which are the only version of the vaccine that pregnant women can take.

Only **healthy health care workers younger than age 49 should** show up for vaccination tomorrow (Saturday, October 31) to the Wichita Mall vaccine clinic (4031 E Harry). This is because all individuals who come to the clinic tomorrow will have to take the nasal spray version, as that is all that remains at this time.

The Health Department hopes to re-open the H1N1 Vaccine Clinic at the Wichita Mall on **either Monday or Tuesday, pending receipt of the next set of H1N1 vaccine.** Further information will be sent as soon as the next quantity of vaccine is received so the public may be alerted.
