which stakeholders have grown accustomed. During 2006 and 2007 the Clerk's office has worked with other departments that are part of the property tax administration process to replace the technology platform in which the tax system currently operates. Replacing this system will be the major emphasis for the office during 2007 and 2008. By taking advantage of a newer operating system, the office expects improvements in business processes and continued gains in workflow efficiency and accuracy, both internally and with other departments.

The County Clerk's Office has improved workflow by working with external stakeholders during the initial phase of many County area projects. Neighborhood revitalization programs now operate more efficiently due to city and County staff being part of the team during the programs' development phase. Real estate developers' understanding of governmental plat filing requirements has improved due to dialogue between developers, the City of Wichita, Sedgwick County and the Wichita Area Builders Association. This has allowed for more efficient, accurate and effective processes to facilitate real property development activities and expedite rebates

to property owners in qualified redeveloped areas and coordinate the payments between taxing jurisdictions.

Ownership of real property was added to the available public information on the County's website, thus reducing the number of phone calls and guaranteeing accessibility to public information at any time. Staff time made available from the reduction in calls allows more time to be focused on real property document processing and document imaging. The new multifunction copier/printers are being configured to serve as scanners to record contracts, resolutions, administrative, real property and tax records to provide faster and easier access to information.
