**Request for Bid  
#06-0170  
TANDEM AXLE DUMP TRUCKS  
ADDENDUM #1**

December 11, 2006

The following questions have been received in response to this Request for Bid. Questions are italicized and answers are bolded.

**You must acknowledge receipt of this addendum on your response form.**

- 1. What is the GVWR of two units requiring trailer hookup?* **The GVWR will not change on the 2 trucks requiring trailer hookups, but the trailers that these trucks will pull are around 20,000lbs rated.**
- 2. For the auto lube system, how many points of lubrication will be needed? We will need list of points.* **We are not able to provide an exact count due to each truck manufacturer having a different amount of lube points. The different vendors that bid on this should have a lube system that is recommended by their manufacturer.**
