

Regional Forensic Science Center

Mission: To provide the highest quality medicolegal and advanced forensic laboratory services to Sedgwick County. The Forensic Laboratory services provide unbiased and accurate analytical testing to support the resolution of criminal cases. As an independent agency operating under the Division of Public Safety, the Regional Forensic Science Center collaborates with public health and criminal justice stakeholders to reduce crime and prevent deaths.

Shelly Steadman, Ph.D.
Director

Overview

The Regional Forensic Science Center (RFSC) provides pathologist-directed autopsies to determine cause and manner of death of those individuals who die and come under the jurisdiction (violent or questionable deaths) of the District Coroner. The Center also functions as the crime laboratory for all law enforcement agencies within Sedgwick County.

The RFSC interacts daily with all law enforcement operations in the County, as well as the rest of the criminal justice system. In addition, the Center provides autopsy services to several other Kansas counties on a “cost recovery fee” basis.

The RFSC employs well-respected scientists who respond to thousands of subpoenas each year and provide hundreds of hours of testimony in our courts.

Strategic Goals:

- Provide timely, accurate, and well-documented postmortem examinations and forensic science analyses utilizing the most current practices and technologies
- Provide professional, unbiased, and unimpeachable interpretation of forensic results and provide the same in expert testimony provided to the courts
- Interact with law enforcement and other criminal justice agencies to facilitate the expeditious adjudication of criminal cases

Highlights

- The RFSC provided forensic services to 26 agencies to aid in their investigation of crime occurring in the region
- In 2023, Medical Investigations attended 572 scenes, up 4.6 percent since 2020
- The RFSC received and triaged 4,002 reported deaths and 1,042 were classified as Coroner’s cases
- The deoxyribonucleic acid (DNA) database provided 89 hits that resulted in 71 new investigations aided

Accomplishments and Strategic Results

Accomplishments

The RFSC has had the following accomplishments:

- the Drug Identification Unit (Drug ID Unit) and Toxicology Laboratory continued to provide important metrics concerning identification and tracking of fentanyl throughout the region. These were made available on the RFSC website so that stakeholders could routinely access the updated numbers;
- Sedgwick County was selected as a Center for Disease Control (CDC) Overdose Data to Action (OD2A) Local Grant Recipient. The award amount for the first year, of a five year project, was \$1.1 million, encompassing two main components (A and B). Component B, in the amount of \$250,000, was directed to the RFSC to fund a Drug Identification Scientist position, Drug Identification Laboratory equipment and supplies, and the collection and testing of drugs and drug paraphernalia found at scenes of death. The RFSC continues to partner with the Kansas Department of Health and Environment (KDHE) as a sub-recipient to implement Strategy-Two of the State's OD2A which enables the expedited testing of post-mortem toxicology cases; and
- the DNA section was awarded \$298,213 for operational costs, equipment, and training. The funding will also be used to offset the cost of maintaining critical instrumentation and analytical software.

Strategic Results

The RFSC maintained all current national and international accreditations demonstrating that it is one of the premier forensic laboratories in the nation providing state-of-the-art forensic analyses of physical evidence (drugs, guns, and fire debris), biological evidence (DNA), and the execution of thorough medico-legal death investigations.

In 2023, the RFSC was unable to meet the goal of completing 90.0 percent of postmortem examinations in 90 days or less. The RFSC achieved 37.0 percent completion in 2023. Instrumentation issues in Toxicology and staffing in Pathology were contributing factors for the metric shortfall. Qualification of the Chief Toxicologist and the addition of a third Forensic Pathologist throughout 2024 is anticipated to improve the Center's ability to meet this goal. Additional method validation on newly acquired instrumentation will also streamline in-house toxicology testing and expedite turn-around times.

The RFSC was unable to complete 50.0 percent of all forensic laboratory reports within 60 days in all forensic disciplines throughout 2023. The RFSC achieved 25.0 percent completion in 2023. Staffing issues and the required lengthy training of scientists were contributing factors for this metric shortfall in the Drug ID Unit. RFSC issues were compounded by an increase in the number of submissions for opioid testing and the prevalence of fentanyl and poly-drug cases encountered by the Toxicology Laboratory.

Significant Budget Adjustments

Significant adjustments to the Regional Forensic Science Center's 2025 Recommended Budget include a decrease in revenue (\$920,942) and expenditures (\$758,696) due to a one-time grant and an increase in charges for services (\$182,364) due to an increase in County Lab and Pathology services.

• Regional Forensic Science Center Administration

Forensic Administration provides technical and operational oversight for Pathology and the Forensic Laboratory. The Director, Forensic Administrator, and Administrative Specialists provide direction and support to the operational areas of the Regional Forensic Science Center (RFSC). The procurement of goods and services, revenue collection, and administration of grants and contracts are managed through this program. This program also serves as the point of contact and liaison to the public, other County departments, and the criminal justice system, as well as handling all Kansas Open Records Act (KORA), and criminal and civil discovery requests.

• Biology/DNA Laboratory

The Biology/Deoxyribonucleic Acid (DNA) Laboratory performs scientific analysis to detect and characterize biological fluids and develops DNA profiles that can be used for the identification or elimination of individuals associated with criminal investigations. The Laboratory also maintains the local DNA database, which facilitates comparisons of DNA profiles developed in Sedgwick County to profiles throughout the State and nation. The database searches provide investigative leads in cases that would otherwise go unsolved. Forensic DNA analysis is most applicable to crimes that are violent in nature (homicide/rape) and the expert testimony provided by program scientists is critical in high profile cases.

• Laboratory Management

Laboratory Management covers the required Federal and State licenses, traceable instrument calibration, and the cost of mandatory continuing education for the Center's scientists and physicians. Laboratory Management also covers the cost of compressed gases used throughout the various forensic laboratories and hazardous chemical/biomedical waste disposal. Revenue consists of restitution paid by defendants convicted of a crime that involved casework performed by the laboratory.

• Toxicology

The Toxicology Laboratory provides forensic toxicology services for the District Coroner in death investigations and local law enforcement. The services include complete postmortem studies, analysis of drug facilitated sexual assault cases, and the analysis of both driving under the influence of alcohol (DUI) and driving under the influence of drugs (DUID) cases. The revenue generated is comprised of fees collected for postmortem forensic testing for out of county autopsy cases.

• Autopsy

Forensic Pathology consists of identification of decedents and postmortem examinations. The autopsies are performed by Forensic Pathologists with expertise in the determination of cause and manner of death. Revenue consists of fees for autopsy services provided to other counties and cremation permits.

• Investigation

Forensic Medical Investigation triages to all deaths reported to the Coroner. If a case falls within the realm of the Coroner’s jurisdiction, staff will conduct a medicolegal death investigation to aid in the determination of cause and manner of death. In order to provide this service, a Medical Investigator is on duty twenty-four hours, seven days a week (24/7). Medical Investigation assists with the identification of decedents, performs searches for next of kin, and manages the final disposition of unclaimed remains.

• Quality Assurance

Quality Assurance coordinates and manages the activities in all Laboratory programs relating to quality assurance and assists Pathology in quality assurance practices. These activities include instrument calibrations and documentation, proficiency testing programs, development and implementation of quality assurance and quality control standard operating procedures, coordination of quality audits, and maintenance of personnel training records. This program ensures compliance with all State and Federal regulations and accreditation criteria. Costs associated with the RFSC’s accreditation and annual inspections come out of this fund center. Quality Assurance also encompasses the Evidence Program of the Forensic Laboratory, which coordinates the receipt and release of evidence for the Center.

• Regional Forensic Science Center Equipment

In 2021, Sedgwick County Commissioners approved settlements in the first round of lawsuits filed against opioid manufacturers and distributors. With the settlement, the County received funds that can be used to recover costs related to the opioid crisis, as well as treatment and addiction programs to address the impact of the crisis. The RFSC is the main source of data for overdose-related deaths and illicit drug trends. As such, a portion of the settlement funds was used to purchase a liquid chromatography tandem mass spectrometer (LC-MS/MS), which is instrumentation used for the confirmation and quantitation of drugs in biological specimens. It is primarily used in the toxicology laboratory for the detection of drugs in post-mortem specimens collected during autopsy and is critical for the determination of cause of death.

• Regional Forensic Science Center Other Grants

For many years, the RFSC has received a variety of no-match grants from the Federal government. These grants include Coverdell Forensic Science Improvement, DNA Capacity Enhancement and Backlog Reduction Program (CEBR), and Justice Assistance Grants (JAG). This funding has been used to supplement professional/technical staff training and for acquisition of analytical instrumentation to replace existing instrumentation or to enhance capacity and/or capability. On rare occasion, the funds have been used for scientific staff salaries and benefits.
