Division of Information Technology

<u>Mission</u>: The mission of the Division of Information Technology is to provide technology-based services in the most costeffective manner, while exceeding expectations in customer service and fully supporting the organization's mission of providing quality public services to our community.

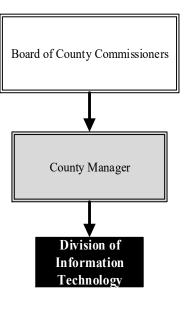

Mike Elpers Chief Information Officer 510 N. Main St., Suite 201 Wichita, KS 67203 316.660.9800 mike.elpers@sedgwick.gov

Overview

Division of Information The Technology (IT) delivers a diverse set of services ranging from answering phone calls and E-mails from employees with questions regarding software use through Helpdesk, to applications developing that streamline processes and improve effectiveness efficiency and of departmental public services. IT supports all enterprise-wide technology solutions including networks. databases. phones. Geographic Information Systems (GIS), and Enterprise Resource Planning (ERP) systems and data. IT provides a centralized technology helpdesk, document imaging services, application and project management services, internet services, and IT The Division works to consulting. anticipate emerging technologies to ahead of ever changing stav technology strategies, systems and architectures, and where possible reduce the costs and risks of technology related assets.

Highlights

In 2024, two IT Staff were recognized and selected to serve Government with Management Information • Sciences (GMIS) International, a professional IT worldwide association of government IT James Arnce will leaders. hold the position of treasurer and Amy Breth will support

the Vendor Relations Committee

Support Customer spearheaded the proof of concept and implementation of mobile tag offices, overcoming connectivity challenges with both the State and County, and collaborating stakeholders for with а successful rollout

Strategic Goals:

- Ensure Sedgwick County's cybersecurity strategy is supportable and viable for current and future needs to safeguard County data and infrastructure
- Ensure the technology platform is ready for existing and emerging technologies to provide maximum availability for employees
- Exceed expectations in customer service and offer timely and effective support to fully satisfy customer requests and inquires
- Provide a reliable and responsive platform to fulfill and satisfy the technology needs of end users

Accomplishments and Strategic Results

Accomplishments

In 2023, ERP upgraded the System Applications and Products (SAP) Business Intelligence Reporting System which helped provide an easier, intuitive way for users to navigate using a web-based user interface to access reports. Additionally, SAP's Learning Management system in SuccessFactors was launched in January 2023 in combination with LinkedIn's Learning Library that interfaces with Learning Management to provide a large group of courses of all types with a variety of topics that employees can take for free.

Over the past year, GIS launched ArcGIS HUB - an interactive website that provides convenient access to GIS data, applications, and web mapping services. ArcGIS HUB combines all content into one easy to navigate site which is directly connected to the County's enterprise system for easy maintenance and updates. GIS deployed a significant update to My Local Taxes, an application that provides efficient access to Sedgwick County personalized property ownership, tax assessment, and tax distribution information which funds local and state government operations.

Strategic Results

IT has several strategic goals involving cybersecurity, platform readiness, customer service, and system availability. One goal for customer service is to resolve 90.0 percent of Helpdesk calls on the first contact. In 2023, the Division successfully resolved 93.4 percent of calls to Helpdesk on the first contact. Another customer service goal is to receive a customer satisfaction average score greater than a "3.0" (on a scale of 0.0 to 5.0). In 2023, IT's average customer satisfaction score was 4.8. Other goals include a greater than 99.5 percent system uptime and application availability. In 2023, the Division recorded 98.8 percent system uptime and 98.3 percent application availability.

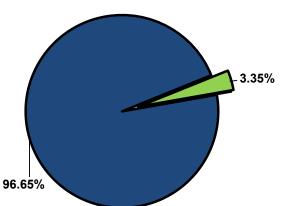

Significant Budget Adjustments

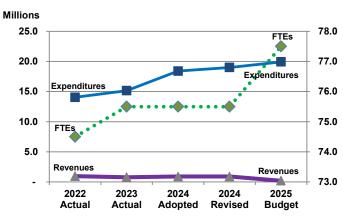

Significant adjustments to the Division of Information Technology's 2025 budget include a decrease in interfund transfers due to a 2024 Capital Improvement Program (CIP) project and a 2024 TRB project (\$1,939,525), an increase in funding for a 2025 CIP project (\$1,354,354), an increase in funding for ongoing TRB projects (\$1,279,488), a decrease in charges for services revenue to bring in-line with anticipated actuals (\$702,649), a decrease in funding due to one-time transfers in 2024 (\$595,634), an increase in funding for annual software maintenance fees and tax system maintenance (\$322,437), the addition of 1.0 full-time equivalent (FTE) ERP Analyst position (\$107,106) and 1.0 FTE Systems Analyst position (\$88,732), a decrease in 2025 TRB project costs compared to 2024 TRB projects (\$78,851), the shifting of costs for the Ruffin network circuit from American Rescue Act Plan (ARPA) funding to the General Fund (\$35,696), and a decrease in funding due to the elimination of Galigeo (\$8,165).

Geographic Information Services

Geographic Information Services (GIS) provides integrated geographic mapping and analysis and has become the primary provider of GIS data for the Wichita/Sedgwick County region. Data and services are provided to citizens, County staff, municipalities, and public/private organizations. Key services include data development, spatial data analysis and visualization, application development, enterprise system support, and other cartographic products.

Project Management

Project Management plans, performs, and directs concurrent IT projects and related activities for Sedgwick County. They coordinate the work of technical/professional teams responsible for the definition, design, development, and implementation of IT business solutions and small to large IT related projects in diverse functional areas of one or more assigned County departments. IT Project Managers are directly responsible for projects from the time requests for services are received until the needed support is delivered.

Application Management

Application Management performs the function of managing application software, maintenance, versioning, and upgrades (whether purchased or built in-house) through an application's entire lifecycle. Application Management is an enterprise-wide approach geared to providing optimal application performance benchmarks while incorporating business processes and IT methodologies. Key service areas within Application Management are the tax system, document management, and public safety system support.

• IT/Application Development

IT/Application Development customizes, enriches, and maintains the software environments used by County departments and partners to ensure the needed functionality is safe, secure, and available. Database Services manages hundreds of unique databases ensuring departments have access to critical data around the clock. Internet Services provides internet, intranet, and extranet application management and site hosting for Sedgwick County. It supports the County internet site (www.sedgwickcounty.org) where 24 applications are provided so citizens can access various e-government services which enable them to do County business anytime without having to call or travel downtown. In 2023, over 15.3 million visits were made to the County's website.

Helpdesk

The Helpdesk provides phone-based and E-mail technical assistance for all department requests and is the first point of contact with resolutions occurring during 91.8 percent of those initial contacts. Customer Support Analysts are field technicians who are dispatched through a ticketing system requesting research, installation, maintenance, troubleshooting, and upgrade support for desktop hardware and software. They also provide consulting services to County departments to assist in matching technology to business needs.

• System Administration, Networking, and Telecommunications

System Administration, Networking, and Telecommunications manage the data and voice infrastructure that support the majority of the technology solutions used by County departments. System Administration supports 474 servers and a virtualized infrastructure consisting of nine large storage arrays and 30 physical hosts. Networking is responsible for supporting network connectivity between County technology systems and maintaining Sedgwick County's electronic security systems. Networking staff consists of IT architects proficient in a large number of communication protocols, communication technologies, and topologies to support uninterrupted connectivity for over 412 network segments connecting 50 different Wide Area Network (WAN) sites. Telecommunications support includes support for unified communications services, voicemail, faxing services, instant messaging, and various call centers with over 4,370 phones and 2,772 voicemail boxes.

• IT Security

The IT Security team safeguards the organization's critical infrastructure, data, and applications from cyber threats by managing essential systems that protect the confidentiality, integrity, and availability of the network. Through proactive vulnerability management, security awareness training, and robust security tools like firewalls and intrusion detection systems, the team minimizes the risk of financial losses, protects sensitive information, and ensures business continuity. The security systems maintained also ensure compliance with critical regulations such as Health Insurance Portability and Accountability Act (HIPAA), Payment Card Industry (PCI), and Criminal Justice Information Services (CJIS).

• Enterprise Resource Planning

The mission of Enterprise Resource Planning (ERP) is to improve governmental transaction and decision making through business process engineering, business analytics, and innovative application of ERP technology in key government processes. ERP staff provide refinement and automation of operations, problem resolution, application of patches, and major upgrades. Sedgwick County ERP systems support all financial and Human Resource processes, including procurement, budgeting, payroll, managing the career site, recruitment, employee training and development, and employee performance and evaluation. ERP systems also include data warehousing and business analytics that are used to integrate systems across the organization and supply visual statistics to make data-driven decisions.

Internet Services

This program was incorporated into IT/Application Development in 2023. Internet Services provided internet, intranet, and extranet application management and site hosting for Sedgwick County. It supported the County internet site (www.sedgwickcounty.org) where citizens can access various E-government services which enable them to do County business anytime without having to call or travel downtown. Internet Services also supported the County intranet site (known as Eline) which is the primary method of information dissemination within the County organization. The County's extranet, also supported by Internet Services, is leveraged by County entities for collaboration with external partners.

Business Solutions Services

This program was incorporated into Application Management and IT/Application Development in 2023. Business Solutions Services provided assistance to departments that needed customized technologies to meet service demands and maximize benefits. It assisted in all aspects of acquiring and deploying new technologies, addressed all questions and issues from inception through go-live, and ensured that the technology met the client's needs. The program customized, enriched, and maintained the software environments used by County staff to ensure the needed functionality was available.

Database Administration Services

This program was incorporated into IT/Application Development in 2023. Database Administration Services provided Structured Query Language (SQL) database administration and consulting on a variety of products and platforms for Sedgwick County, primarily in support of over 659 unique databases. The majority of services were seen as internal to Technology Services as management of databases ensure departments access to their data. Major databases supported included those used with the County's tax/appraisal system, document management, Sheriff, District Attorney, Finance, and COMCARE.

Document Management

This program was incorporated into Application Management in 2023. Document Management was responsible for assisting County departments with determining their imaging and document management needs. They identified solutions, and designed and implemented systems and processes to fulfill those needs. Staff supported the OnBase enterprise content management system, including workflows, business process management, and retention of all E-documents. They also provided consulting services for other systems, related hardware, and imaging technologies.

• Subscriber Access

This program was incorporated into the Director's Office in 2023. The Subscriber Access Network provided citizens, as well as public and private organizations, with electronic access to Sedgwick County's public records on a subscription basis. What subscribers paid for was access, not information. That is, instead of calling a County office or coming to the Courthouse and using one of the public access computers, subscribers used County applications from any internet capable remote computer. Although a significant amount of information is already available for free through the County website, subscribers obtained up-to-the-minute information and details not available on the website. The information available was primarily related to the court system and taxes.

• Tax System Maintenance

In 2002, the Kansas Legislature passed a bill granting the Register of Deeds authority to charge an additional fee of \$2 per page for the recording of real estate transactions. These transaction fees are deposited in the Technology Enhancement Fund. K.S.A. 28-115(a) states these funds shall be used by the Register of Deeds to acquire equipment and technological services for the storing, recording, archiving, retrieving, maintaining, and handling of recorded data. By authority of the Register of Deeds, unexpended funds may be transferred to the General Fund to be used for equipment or technological services relating to land or property records filed or maintained by the County. In 2014 through 2023, transferred funds were used for software maintenance costs related to Sedgwick County's tax systems.
